Restaurant Technologies, Inc.
Opens Depot in St. Louis Market

MINNEAPOLIS, MINNESOTA, December 12, 2005 – Restaurant Technologies, Inc. (RTI), a leading provider of bulk cooking oil management services to the restaurant industry, is pleased to announce that the company has opened a depot in the St. Louis, Missouri market.

Opened this past January, the RTI depot will employ approximately 20 personnel. Michael Hennies, the depot's general manager, oversees the facility and its operations, which is located at 4806 Park 370 Boulevard in Hazelwood, Missouri. The St. Louis depot services RTI customers in roughly a 100 mile radius, including the Missouri cities of Columbia, Washington, Rolla, Farmington, Bowling Green and the Metro East area of St. Louis. Additionally, the depot serves customers in Springfield, Vandalia, Salem, Mount Vernon and Chester, Illinois.

RTI provides a single source solution for the handling of frying oil. RTI's patented system eliminates the handling of hot oil, improving employee satisfaction and safety, restaurant cleanliness and can provide significant cost savings through reduced oil usage and workman's compensation claims.

The company has strategically located depots throughout the United States to support its customers, which include companies in the fast food industry, restaurants, grocery stores, school, hospitals and other food service providers. A depot serves as the distribution center for delivering new cooking oil and housing waste oil. Currently, RTI has 28 depots nationwide with plans to expand to 36 by the end of 2006.

"We are pleased to expand our operations into the St. Louis market," said Jeffrey R. Kiesel, chief executive officer at Restaurant Technologies, Inc. "Our customer base is growing and we believe RTI can provide more efficient service and delivery by opening this new facility. We look forward to being a part of the Hazelwood business community."
