

We're Moving!

Restaurant Technologies, Inc (RTI) is proud to announce the move from our Headquarters in Eagan, MN to a newly refurbished, 60,000 square foot location in Mendota Heights, MN.

The beautiful two-story building combines three major RTI functions into one convenient location: National Headquarters, Warehouse and Product Manufacturing and Distribution Depot. The open floor plan supports RTI's culture of community, commitment and collaboration; a culture that has supported tremendous growth over its 11 year history.

“We are excited to move into our new facility and to consolidate our Minnesota operations.” Jeff Kiesel, CEO of Restaurant Technologies, Inc. said. “Our larger facility and dynamic design are symbolic of our future at RTI - growing and expanding within a great company culture.”

Incorporated into the open design are eco-friendly materials such as DirTT demountable office partitions, carpet tile and recycling facilities that support RTI as a “green” solutions provider to the Restaurant Industry.

RTI will be fully operational from the new facility starting January 2011.
