Multi-Unit Chain Sees \$160K Insurance Premium Reduction with Total Oil Management Solution

Restaurant Technologies partnered with a 20-location, multi-state casual dining restaurant company to improve their back-of-house operations and cooking oil handling methods. In the process of installing the Total Oil Management™ solution, the company was introduced to an insurance advisor to explore additional benefits of the automated equipment and services.

Prior to partnering with Restaurant Technologies, the company was experiencing numerous Workers' Compensation claims related to manual cooking oil handling. These claims resulted in their Experience MOD increasing from 1.32 to 1.62, ultimately affecting their insurance premiums. **By implementing the Total Oil Management system and working with the insurance advisor, the multi-unit chain was able to immediately save \$160,000 per year (\$8,000 per store) in direct premium costs due to the enhanced safety features implemented in their kitchens.**
